## SUMMARY

Software Engineer with 5+ years of experience delivering enterprise solutions for a Fortune 500 financial services client within an Agile environment. Proven track record building and scaling a GDPR- and DORA-compliant risk and governance platform (ProcessUnity) from the ground up, and automating large-scale data migration workflows with Python and Pandas. Experienced in requirements gathering, user story management, and coordinating global stakeholders across multiple regions. Passionate about building sustainable, scalable software and driving process improvement through automation and mentorship.

## WORK EXPERIENCE

### Tata Consultancy Services

*Developer, BFSI US West – American Express Group Client | Mumbai, Maharashtra, India | Jan 2021 – Present*

Software Engineer supporting American Express across the Third-Party Lifecycle Management and Enterprise Oversight (EO) Portal programs, spanning data engineering, ProcessUnity development, and Agile delivery leadership.

#### **Data Migration – Third-Party Lifecycle Management Portal (Jan 2021 – Mid 2022)**

- Accomplished a 90% increase in overall data processing efficiency, as measured by reduced conversion time from several hours to a few minutes, by designing and automating Python-based ETL scripts to transform legacy data into the revised format.
- Accomplished seamless, accurate data uploads to the third-party lifecycle management portal, as measured by improved data accuracy and reduced manual intervention, by building an automated data migration framework using Python, Pandas, and JSON to extract, process, and transform large-scale Excel datasets.

#### **EO Portal Development – ProcessUnity, GDPR & DORA Compliance (Mid 2022 – Present)**

- Accomplished the end-to-end build-out of the European Outsourcing (EO) Portal, as measured by full GDPR and DORA regulatory compliance, by designing and developing cloud-based data governance and risk management (GRC) solutions on ProcessUnity for the client's European Data Governance team.
- Accomplished a 70% increase in platform performance, as measured by post-migration system throughput, by leading the end-to-end migration of data from a legacy .NET platform into the ProcessUnity-based EO Portal.
- Accomplished a 20% increase in team velocity, as measured by sprint throughput, by serving as Scrum Master and facilitating daily stand-ups, sprint planning, and backlog grooming sessions.
- Accomplished aligned, on-time cross-functional delivery across AmEx Phoenix, AmEx Madrid, and AmEx India stakeholders, as measured by consistent sprint delivery, by gathering requirements and managing the product backlog through user stories in Rally and JIRA.
- Accomplished stable, on-time EO Portal releases, as measured by reduced post-production defects, by supporting testing across UT and SIT cycles, assisting with UAT, and managing defect resolution, documentation, release planning, and post-production support.
- Accomplished faster ramp-up and increased team capability, as measured by successful onboarding of new hires, by training and mentoring new associates on ProcessUnity development and Agile/Scrum methodologies.
- Accomplished 97% delivery accuracy across the team, as measured by client satisfaction and delivery metrics, by partnering directly with stakeholders to deliver creative, innovative solutions to complex technical problems.

**Technologies & Keywords:** ProcessUnity, Python, Pandas, JSON, ETL, Data Governance, Risk & Compliance (GRC), GDPR, DORA, Agile/Scrum, Rally, JIRA, Stakeholder Management, Excel, GitHub.

## EDUCATION

**Jain (Deemed-to-be University)** — 2021 – 2023

Master of Computer Application, specializing in Full Stack Development | CGPA: 9.69/10

**Kishinchand Chellaram College (Mumbai University)** — 2017 – 2020

Bachelor of Science, Computer Science | CGPA: 9.46/10

Activities: Tech Club, Kiran – Technical Team

## PROJECTS

### E-Commerce Full Stack Web Application – E-Mart

[github.com/fraronbalsara/E-Commerce-Full-Stack-Web-Application](https://github.com/fraronbalsara/E-Commerce-Full-Stack-Web-Application)

- Built a full-stack e-commerce platform with a three-tier architecture (React.js/Bootstrap frontend, Spring Boot microservices backend, MySQL database).
- Enabled customer sign-up/login, cart management, checkout, and payments via Razorpay or COD; unregistered users can browse products only.
- Supported seller and admin roles for managing products, users, and orders across the platform.

### Python Discord Bot (Ferdinand)

[github.com/fraronbalsara/Ferdinand](https://github.com/fraronbalsara/Ferdinand)

- Built a Discord moderation bot in Python (Discord.py, asyncio) with kick/ban/mute commands, automatic profanity filtering, 40+ language translation, giveaways, and a custom in-server currency and casino game system.
- Hosted on Heroku with a PostgreSQL database.

## SKILLS & CERTIFICATES

**Programming Languages:** Python, Java, SQL.

**Web Technologies:** HTML, CSS, JavaScript, React.js, Spring Boot, JSON, Bootstrap.

**Databases:** MySQL, PostgreSQL.

**Other Technologies:** ProcessUnity, GDPR & DORA Compliance, Agile & Scrum (Rally, Jira), Git and GitHub, Android Studio, Discord.py.

### Certificates:

- Foundation: Product Experience UX/UI Testing Foundation
- Succeeding in Web Development Full Stack and Front End – LinkedIn Learning
- MTA Security Fundamentals – Credly
- Developing AI Applications on Azure – Coursera
- Computational Thinking for Problem Solving – Coursera
- Digital MFDM™ AI Aware Certification
- Process: ITIL Foundation Certification

**Languages:** English, Hindi, Gujarati, Marathi (most to least proficient).
